HIGHER PRICES THAN WEDNESDAY'S

There is Some Apprehension as to Monetary Conditions.

BIG RISE IN L. & N. STOCKS

Went Up Seven Points on New York Stock Exchange-Southern and Illinois Central in Sympathy.

(By Associated Press.)

NEW YORK, Nov. 28.-Prices of stocks closed to-day considerable higher than on Wednesday, in spite of some rather un-favorable developments and the continapprehension over the

Mednesday, in spite of some rather unfuvorable developments and the continuance of some apprehension over the monetary conditions.

The advances were attributed to some extent to the demand from the short interest to cover. Inducements to do this were offered by the bidding up of prices by an element amonst the tradeis which set out to make a campaign against the hears. The short interest was known to have been accumulating contracts for a considerable time, and their commitments were extended on Wednesday on To-day's trading, nevertheless, was dulted in the eve of the holiday.

To-day's trading, nevertheless, was dulted in the exceed half a million shares. The attendance at the board was small, many brokers having left the city on Wednesday evening to stay over the end of the week. It was regarded as a favorable incident that day passed without any additional pioneuncement of hostility on the part of either side to the controversy for control of Colorado Fuel and Iron.

The most notable demonstration of the day was in Louisville and Nashville, which was lifted nearly? polnts, carrying with it Southern Railway and Illinois Central in sympathy. The movement was inextinained, except on the ground of comparisons contained in a recent circular of the investment value of Louisville and compared with other dividend-paying stocks. The movement in Sugar contained at the ear marks of a campaign against the schorts, and the urgent demand at the lact carried the price up over 5 points. Vague rumors of a deal accompanied the rise in Hocking Valley. Another center of activity was in the local Tractions. Brooklyn Transit at this time led the advance. Manhattan was very active, but fluctuated narrowly and showed the effects of realizing.

Humors were again circulated of a commitment of a line in the local transit facilities.

STOCK MARKET GOSSIP.

there was a better feeling in the storiker vesterday, and in most ca terday, and in most can higher. Traders were enco d by the fact that the discount f the Bank of England has not been ased as it was feared it would be

creased as it was feared it would be on Thursday.

Opening prices were fractionally higher than closing prices on Wednesday, and most stocks showed an advance over London quotations. This was particularly the case with Louisville, which sold in London at 1224, out opened here at 124.

This was the lowest price of the day for Louisville, and from that time on the stock stendily advanced until it sold above 130. The stock was largely absorbed and condinued to be in active demand up to the close of the market.

It is said that the recent circular of Messus, Scott & Stringfellow, which was in large demand on the New York Stock Exchange vesterday, was responsible for this upward movement. Mr. Scott received several telegrams during the day telling him that his circular was read with intense interest, and there is every reason to believe that the stock went up on the spinedid showing which he made. It will be recalled that Mr. Scotts circular made comparisons between Louisville and St. Paul. showing that Louisville selected too low or St. Paul is very much too high. In vesterday's market St. Paul was strong with an advancing tendency, and as Louisville enjoyed a brilliant rise traders seemed to think that St. Paul was much too low.

The advance in Louisville had a good.

much too low.

The advance in Louisville had a good effect on the whole market, and a New York broker, who is well known in Richmond, expressed the opinion that the market had been oversold and that the end of the bear campaign was at an end.

mond, expressed the opinion that the market had been oversoid and that the end of the bear campaign was at an send.

Sugar was also very strong and advanced several points during the day. The other industrials were very quiet. Sales of Chemical were made from G1 to 61½, and there was considerable trading in Slosa around 60, but the price did not advance and the closing bid was 53. It is said that large hilders of Sloss common have been offerly; to buy all that was to be had at 50 and yesterday's trading indicated that o'n increased their holdines at that price, although Sloss was offered at 60 at the close.

Southern Facific, next to Louisville and St. Paul, was the strongest of the railroad stocks. Union Pacific was firm, but did not show much advance. Norfolk and Western and Chesapeake and Ohio made slight gains.

Colorado and Southern first preferred continued to show weekness, owing to the quarrel between Golid and Hawley. Some gales were made at 60, but the last sale was at 68, with 61½ bid at the close. Holders of this stock in Richmond regard it as a very safe purchase and believe it will go much higher. It is said, however, that if Mr. Golid succeeds in getting control of the Colorado and Southern for the role of that road from the Colorado and Southern to the Penver road, and it is upon that theory that the stock had sold the sub-tress of that road from the Colorado and Southern to the Penver road, and it is upon that theory that the stock had sold the sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of that road from the colorado and Southern Railway pid. 100 25 and sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of that road from the Colorado and Southern Railway pid. 100 25 and sub-tress of t

NEW YORK. Nov. 28.—The cotton market opened steady at 5210 points advance with some of the more active positions selling up 5200 points on as good cables as expected and bad weather conditions in most parts of the South. Texas reported a range of temperature from 25 to 35, while other localities report the severest weather of the season with sleet and cold rains, practically stopping any further promise of top crop growm.

Following the opening call the market was irregular within a range of 5210 points on the more active months, with the trading largely of a professional character in good part for evening-up outstanding contracts in anticipation of the bureau report, due to make its appearance December 3d. Pending the publication of this report the entire cotton trade is showing caution and the volume of business is light. To day's transactions were confined to about 200,000 bales.

In the afternon buying picked up a little on the week-end figures, which were more buillish than expected with Secretary Hester making the "insight" movement 307,000 bales against 427,000 base last year. A large estimate for receipts at New Orleans for to-morrow, however, held the upward movement in check and grew to be a factor in closing the market at about the lowest figures of the session.

NEW ORLEANS. Nov. 28.—COTTON—Spot cotton quiet and steady; quotations uncharged. Futures were dult; yesterday's advance in deliveries at Liverpool was faintly reflected on this side and taken in connection with the first general heavy frost formation in the cotton belt helped to lend a mildly firmer tone to the American market to-day. The local market opened 365 points above Wednesday's closing figures, and thereafter fluctuated over a fairly wide range, but with a slightly softening tendency that placed values at the close net I point up to 1 down, compared with Wednesday's prices.

FIGHTING TEMERAL

Thirty years later this "wooden wall" of England was condemned by the British Government to be broken up.

One of the Six Photogravures in Part II of

IUNDRED DICTURES

Is a Reproduction of the Famous Painting by J. M. W. Turner, which represents the Temeraire being towed to her last resting place.

Of this picture Ruskin, who of all men did most to make Turner's name famous the world over, says: "Of all pictures, not visibly involving human pain, this is, I believe, the most pathetic ever painted."

Turner loved the sea and sailors and idolized the memory of Nelson, so that to him there was a pathetic interest in the last hours of the one of the great sea fighter's beloved battleships. This pathos he conveys to all who see his painting. The ghostly towering hulk of the old wornout threedecker, slowly towed through the evening haze by the pertly officious little steam tug-the old giving place to the new-affords a subject which, in less competent hands than Turner's, could not fail to form a striking picture. Turner rendered it one of the most noteworthy ever painted.

The original picture forms one of the most cherished glories of the English National Gallery, to which it was bequeathed by the painter. The British nation is proud of this noble possession. Why should you not take pride in possessing a worthy reproduction of so worthy a picture?
